

A photograph of three young women, likely students, working together on a project. They are in a room with other people in the background, suggesting a workshop or conference setting. The woman in the foreground is focused on a breadboard with many colorful wires. The woman in the middle is looking at the breadboard and has her hand near her mouth. The woman in the background is also looking at the breadboard. A laptop is visible on the left side of the frame.

**Tapia Conference  
September 16, 2016  
Austin, TX**

# **Engaging Underrepresented Students in CS**

# Welcome and Introductions

**Frieda McAlear, Research Associate**  
**Level Playing Field Institute and Kapor Center for Social Impact**  
**@FriedaMcA**

**Solomon Russell, CS Professor**  
**El Camino College, California**  
**@SolomonLRussell**

**Dan Garcia, CS Teaching Professor**  
**UC Berkeley**  
**@CSPBJC**

**Tiffany Price, Community Engagement Manager**  
**Kapor Center for Social Impact**  
**@THoodPrice**

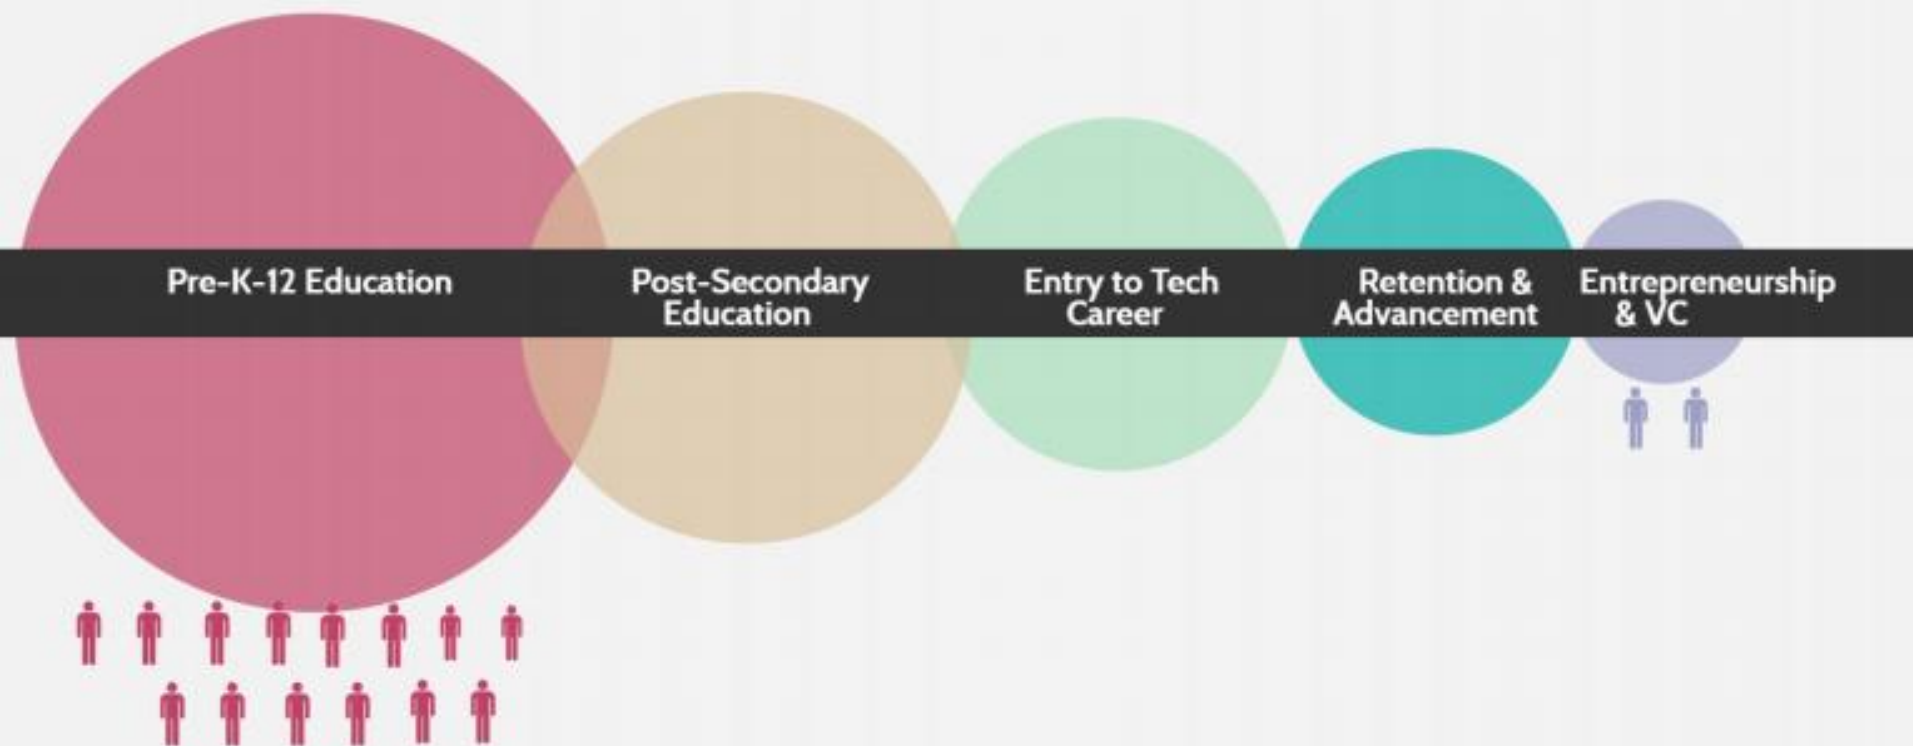

Why do we need this panel?

# The Leaky Technology Pipeline: A Framework for Understanding Disparities in Tech

---

**(1) There are multiple leaks across the pipeline where we are losing talent.**

**BARRIERS TO ACCESS**

•high-quality education and courses•peer, family, college networks•cultural capital•internship/mentorship/training•

**PSYCHOLOGICAL BARRIERS**

•stereotype threat•imposter syndrome•perceptions of the field and environmental cues• lack of same-race/gender role models•belonging and isolation•

**BIASES (CONSCIOUS & UNCONSCIOUS)**

•expectations and beliefs about ability•stereotyping and decision-making patterns•overt mistreatment and microaggressions•

**(2) There is BOTH a pipeline problem AND a bias problem.**

**(3) Stakeholders must implement comprehensive solutions to increase diversity in tech.**

**“Culturally relevant teaching is a pedagogy of opposition that recognizes and celebrates Africans and African-Americans”**

**- Gloria  
Ladson-Billings**

# Culturally Responsive Computing:

A young woman with dark hair in braids, some of which are accented with orange, is shown in profile, focused on her laptop. She is wearing a green jacket. The background is a blurred classroom setting with other laptops and a large screen displaying blue-toned content.

- Asset building
- Reflection
- Connectedness

**Dr. Kim Scott, *Compugirls***

A photograph of a river flowing over dark, wet rocks, creating white rapids. The river is surrounded by green grass and some trees. The text is overlaid on the image.

# Session Flow

1. Panel presentations:  
Early exposure to career pathways
2. Peer learning and sharing out

A close-up photograph of a young Black woman with her hair styled in braids. She is wearing a silver tiara and a yellow lanyard with the text 'SMASH: US' and a circular logo. She has a slight smile and is looking off-camera to the right. The background is blurred, showing other people at what appears to be a social event.

**Who's  
in the  
room?**

# Ice Breaker

**Level Playing Field Institute**

**Early Exposure: Hackathons**

**Solomon Russell**

**Computer  
Science PD  
is different**

- Inquiry
- Equity
- CS Concepts
- Culturally Relevant

# Creating a Culture

# **SMASH Core Values**

- 1. Excellence in STEM Education**
- 2. Community / Teamwork**
- 3. Leadership**
- 4. Social Justice**
- 5. Sustainability**

# Culturally Relevant Pedagogy

**Dan Garcia**

**CSTA Golden Gate chapter @ UC Berkeley**

(we gather Bay Area HS Computing teachers monthly)

**We hold regular workshops and share best practices to engage diverse students!**

## CS Education Day @ UC Berkeley

(500 Jrs and Srs visit campus during CS Education Week for talks and hands-on CS!)

**We choose the schools to invite based on their % of diverse students!**

BJC Award-winning Projects being demonstrated at **CS Ed Day**  
**Let older students show younger students great examples of what can be done!**

**BFOIT Middle-School (SCI-FY) and High-School (ITLP) Summer Graduations**  
2-week Summer Institute in August, Monthly meetings (program now closed)  
**Let them demo their (choose-your-own) final projects to friends and family!**

**CS Scholars Program** follows a cohort model; these students take the same courses and are placed in the same discussion sections in our CS program.

**Keep a cohort together so folks never feel isolated; selected according to need...**

# One way to get computing into K-12...

- **New Course: “Computer Science : Principles”**
  - **Engaging, accessible, inspiring, rigorous**
  - Focused on the fundamental concepts of computing (Computational Thinking)
  - An impetus for college curriculum reform
- **SINGLE SOURCE OF NATIONAL LEVERAGE!**

# what is CS Principles?

## 7 big ideas

- computing is a **Creative** activity.
- **Abstraction** reduces information and detail to facilitate focus on relevant concepts.
- **Data** and information facilitate the creation of knowledge.
- **Algorithms** are used to develop and express solutions to computational problems.
- **Programming** enables problem solving, human expression, and creation of knowledge.
- the **Internet** pervades modern computing.
- computing has global **Impacts**.

  - collaborating

# what is CS Principles?

## 6 computational thinking practices

- 
- A Venn diagram consisting of two overlapping light green ovals. The left oval contains three bullet points: 'connecting computing', 'developing computational', and a partially visible 'solving computational'. The right oval contains two bullet points: 'communicating' and 'collaborating'. The intersection of the two ovals contains the text 'computational artifacts'.
- connecting computing
  - developing computational
  - solving computational
  - communicating
  - collaborating
- computational artifacts

# Two Performance Task Assessments

---

## ■ Explore PT

- "...you will explore a computing innovation of **your choice**"

## ■ Create PT

- "This performance task requires you to develop a program **on a topic that interests you.**"

# From the Curriculum Framework...

- EK 7.4.1A The innovation and impact of social media and online access **varies in different countries and in different socioeconomic groups.**
- EK 7.4.1C The global distribution of computing resources **raises issues of equity, access, and power.**
- EK 7.4.1D Groups and individuals are affected by the **“digital divide” — differing access to computing and the Internet based on socioeconomic or geographic characteristics.**

# UC Berkeley's BJC

## The Beauty and Joy of Computing

### What we've found works

- Make "**Fun**" a learning objective!
- Name your course accurately
- Pair Programming throughout
- Read & comment about each others work
- Make the class free (no barriers to entry)
- Awesome TAs as role models (50-50)
- Lab-centric instruction, enthusiasm!
- Program powerful ideas with blocks
- Have open-ended projects

[bjc.berkeley.edu](http://bjc.berkeley.edu)

**SMASH + BJC Academic Year Program @ UC Berkeley, near Stanford, UCLA**  
Every Saturday from 2015-2016 they gathered, a local teacher taught them BJC...  
**We reached diverse students who had no access to a high school CS course!**

## COLLEGE

## UC Berkeley Professor Drops Pre-Final Computer Science Rap (VIDEO)

UC-Berkeley professor [Dan Garcia](#) recently laid down a full-blown “Gin & Juice” remix to help get his students ready for a final.

**Don't hesitate to show your flavor, and share your interests with your students!**

# Questions

**Is there a time in CS where you felt disengaged or 'shut down'?**

# Questions

**What are the most engaging pedagogies and curricula that you've experienced or designed?**

# Questions

**What are the barriers to engagement? How do you overcome those?**
